A lot is the sequel to Liss's gospel and tells the story of Jesus's followers during the 30 years after his death. It describes how the 12 apostles, formerly Jesus's disciples, spread the message of Christianity throughout the Mediterranean against a backdrop of persecution. With an introduction by P.D. James

This bridge-building work about the natures of pastor and preacher and how they can be effectively integrated, quickly became a classic when it was first published and has never been duplicated. The author argues that while they sometimes seem to conflict, these ministry functions share a common process and a common goal and can be synchronized around the image of "redemption." Preserving both psychological awareness and theological integrity, the preacher is nestled into the pulpit with an enhanced sense of the power and influence of preaching in people's lives and growing. Why have people from different cultures and eras formulated myths and stories with similar structures? What does this similarity tell us about the mind, morality, and structure of the world itself? From the author of 12 Rules for Life: A Guide to the Ancient Art of Happy Living, comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals, myths, and religious stories mean to us. A cutting-edge work that brings together neurology, psychology, sociology, and Freudian and Jungian approaches to mythology and narrative, Maps of Meaning presents a rich theory that makes the wisdom and meaning of myths accessible to the critical modern mind.

The spectacularly written Thousand Autumns of Jacob de Zoet is the most impressive achievement of its eminent author. Praise for The Thousand Autumns of Jacob de Zoet "A page-turner . . . David Mitchell's masterpiece; and also, I am convinced, a masterpiece of our century!" - The New York Times

The Thousand Autumns of Jacob de Zoet is a stunning departure for this brilliant, restless, and wildly ambitious author, a giant leap forward by even his own high standards. A bold and epic novel of a rarely visited point in history, it is a work as exquisitely rendered as it is impossible-to-read. The year is 1799, the place Japan-Haruku, the high-walled, fan-shaped cultural island that is the Japanese Empire's single port and sole window into the world, designed to keep the West at bay, the fastest outbound of the war-ravaged Dutch East Indies Company, and a facts prison for the dozen foreigners permitted to live and work there. To this peace of diverse merchants, deceitful interpreters, costly courtesans, earthquakes, and typhoons comes a dude Jaco de Zoi, a devout and resourceful young clerk who has five years in the East to earn a fortune of sufficient size to win the hand of his wealthy fiancée back in Holland. But the tale's original intentions are upended after a chance encounter with Orito Aibagawa, the disfigured daughter of a samurai doctor and midwife to the city's powerful magistrate. The borders between propriety, profit, and pleasure blur until Jacob finds his vision clouded, one rash promise made and then fatefully broken. The consequences will extend beyond Jacob's worst imaginings. As one cynical colleague asks, "Who ain't a gambler in the glorious Orient, with his very life?" A magnificent mix of luminous writing, prodigious research, and heedless imagination, The Thousand Autumns of Jacob de Zoet is a formidable novel. The New York Times Book Review "By any standards, The Thousand Autumns of Jacob de Zoet is a formidable novel." - Jane Read, The New York Times Book Review "A beautiful novel, full of life and death, city and countryside, and the boundary between life and death. The reader will be carried away by the novel's compelling narrative and captivating characters." - Maurice Corrigan, NPR

The logorrhea of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

"According to Ricoeur, the most primal and spontaneous symbols of evil are defilement, sin and guilt. Ricoeur moves from the elementary symbols of evil into the rich world of myths and he does so by suggesting that the clue to the relation between philosophy and mythology is to be found in the aphorism: "The symbol gives rise to the thought." Ricoeur’s method and argument are more lucid and rich and its success in a short review. Suffice it to say that this is the most massive accomplishment of any philosopher with the ambition of Christian faith since the appearance of Gabriel Marcel—Sallie K. Keane, The Christian Century.

This volume, the first part of Paul Ricoeur’s Philosophy of the Hilfs, is an author’s carried out within carefully imposed phenomenological brackets. It seeks to deal with the essential structure of man’s being in the world, and so it suspends the disturbing dimensions of existence, the heritage of passion, and the vision of innocence, to which Ricoeur returns in his later writings. The result is a conception of man as an inscrutable Cogito, which can make the popular reader and object intelligible and provide a basic continuity for the various aspects of inquiry into man’s being in the world.

The definitive firsthand account of the groundbreaking research of Paul Ricoeur—the basis for the award-winning film The Stanford Prison Experiment Reveiwed social psychologist and creator of the Stanford Prison Experiment Philip Zimbardo explores the mechanisms that make good people do bad things, how moral people can be seduced into acting immorally, and what this says about the line separating good from evil. The Lucifer Effect explains how—and the myriad reasons why—we are all susceptible to the "dark side." Drawing on examples from history as well as his own trailblazing research, Zimbardo details how situational forces and group dynamics can work in concert to make decent men and decent women, men, and, for the first time in detail, and in particular, the human potential for evil. This is a disturbing book, book one that has never been more necessary—"A riveting Gladwell! An important book to all politicians and social commentators. . . . should read this." —The Times (London) "Penetrating . . . Combining a dense but readable and often engrossing exposition of social psychology with an impassioned moral seriousness, Zimbardo challenges readers to look beyond glib denunciations of evil-doers and ponder our collective responsibility for the world’s ills." —Publishers Weekly "A gripping discussion . . . Zimbardo couples a profound critique of modern life's scientific desensitization of the psychology of violence or evil!" —The American Prospect "Penetrating . . . Zimbardo enables us to better understand a variety of harrowing phenomena, from corporate malfeasance to organized genocide to how once upstanding American soldiers came to abuse and torture Iraqi detainees in Abu Ghraib. He replaces the long-held thought that babies are born selfish and that it is the role of society—and especially parents—to transform them from little sociopaths into civilized beings. In Just Babies, Paul Bloom argues that humans are in fact hardwired with a sense of morality. Drawing on groundbreaking research at all, Bloom demonstrates that, even before they can speak or walk, babies judge the goodness and badness of others, actions, feel empathy and compassion; act to soothe those in distress and have a rudimentary sense of justice. Still, this innate morality is limited, sometimes tragically. We are naturally hostile to strangers, prone to parochialism and bigotry. Bringing together insights from psychology, neuroscience, evolutionary biology, and philosophy, Bloom explores how we have come to surpass these limitations. A long the way, he examines theories that link morality to religion, our biological predispositions, religious extremities, and how morality changes as we grow. In his analysis of the morality of children and adults, Bloom rejects the fashionable view that our moral decisions are driven mainly by our feelings and unconscious biases, as just a reason has driven our great scientific discoveries, he argues, it is reason and deliberation that makes possible our moral discoveries, such as our comprehension of the "principle of justice." Ultimately, it is through our imagination, our compassion, and our ability to reflect on our own moral lives. Women desire to live well. However, living well in this modern world is a challenge. The pace of life, along with the new front of social media, has changed the landscape of our lives. Women have been told for far too long that being on the go and accumulating more things will make their lives full. As a result, we grasp for the wrong things. The result of being filled with things. God created us to live with him, to know him and to be loved by him. In order to live well and when we draw from the water he continually provides, it will change. Our marriage, our parenting, and our homemaking will be transformed. Mommy blogger Courtney Joseph is a realistic. She tackles the challenge of finding balance in a world that is价位s being addicted to social media. Her book, Please stop adding to the problem of social media addiction in your life. By reading this book, you will learn to be present in the moment. The first edition of the new Catechism went out across the world in many language versions. This gave the local Churches the chance to study it in depth. Through their bishops and teachers they responded with comments on texts that needed refinement.

The present edition was developed in the light of these comments and published in Latin as the definitive Editio Typica. This book is the English translation of the Editio Typica.
